

# Take & Make Craft

## Week One

### Pokemon Terrariums Instructions

Supplies Provided by Library:

2 Pokemon Figures

1 Plastic Container

Supplies Needed @ Home:

Dirt, leaves, small rocks, sticks etc. & anything else you may want to add in a home for your Pokemon!

You are challenged to make a loving home for your new Pokemon friends out of things you have around the inside and outside of your home!

First decide what you would like the terrarium to look like. A terrarium is a container used for growing or displaying plants. In this case, it will be a home for a Pokemon!

What sorts of materials would make your Pokemon most comfortable?

Choose your materials (dirt, grass, sticks, leaves, construction paper...use your imagination!) Set them up in the plastic container any way you would like. Once you have your terrarium made, set up your Pokemon in it!
