

# January Take & Make

## Snowy Owl

**FREE!**

Taken in part from <https://frugalfun4boys.com/pine-cone-snowy-owl-craft/>

**SUPPLIES INCLUDED:**

- Pine cones
- Two or three colors of felt scraps
- Googly eyes
- Cotton balls – about 15 per owl

**PROVIDED BY YOU:**

- Strong glue (like hot glue or tacky glue)
- Sharpie marker (optional)

**INSTRUCTIONS:**

1. Pull the cotton balls apart into smaller pieces before stuffing the pine cones. A full cotton ball won't fit, and they won't look as fluffy that way anyway.
2. Stuff the pine cones with cotton ball pieces
3. Poke the cotton in between the scales of the pine cone.
4. Cut out wings from felt. If you want, use black Sharpie marker to draw some patterns on the wings. Real snowy owls have black markings only as juveniles. Adult males are almost completely white, while adult females have small amounts of black barring.
5. Cut out a beak from felt, and two circles from felt. The circles should be slightly larger than your googly eyes. Glue the googly eyes to the felt circles with strong glue.
6. Then you're ready to assemble your owl! Glue on the eyes, beak, and wings.

NOTE: Make sure that each felt piece is glued to the actual pine cone in at least one spot. If the felt is glued only to the cotton balls, you can pull it right off again because the cotton is not really attached to the pine cone.
