May Take & Make
CD Scratch Art

**Supplies Included:**
- Old CDs
- Acrylic paint
- Foam brushes
- BBQ Skewer

**Supplies Needed From Home:**
- Pencil

1. Paint the shiny silver side of the old CD with acrylic paint. You can use one color, two or numerous combinations. Make sure you have a thick layer of this color so that it becomes easy to scratch the color later.

2. Let the paint dry for a couple of hours.

3. Using the pencil, lightly draw your favorite design on the painted side.

4. Use the BBQ Skewer to scratch on your pencil markings. As you scratch away the paint from the surface of the CD the shiny silver showed through and will looked fantastic against the colorful paint. Try not to scratch very hard otherwise you’ll damage the shiny coating.
