

Planting Zinnias

Supplies Provided:

Zinnia Seeds
Color-Your-Own Flower Pot
Soil Wafer

Supplies From Home:

Crayons, Markers, Colored Pencils
Paper Bowl (or something else to
break up your soil wafer in)
Water
A safe place for your plant to
grow

1. Place the soil wafer in the paper bowl. A bit at a time, add water and break up the disk until the resulting material is fluffy.
2. Add the material to the color-your-own flower pot.
3. Place few seeds on the top and lightly cover with some of the soil material.
4. Put you plant in a sunny location and water it daily. Within a few days you should see the flowers start to sprout.
